

SoulChef — Escapism: Instrumentals

Hi Doug,

I pulled together current pricing options for **SoulChef's Escapism: Instrumentals** double LP project. The goal was to keep this simple and show real manufacturing economics side-by-side.

One important thing that makes GoodTunes® different from the traditional vinyl route: The artist doesn't pay out of pocket for vinyl manufacturing upfront.

Instead, fans purchase first. We then use those actual sales numbers to dial in the pressing quantity before going to press. That means:

- less guessing,
- better pricing tiers,
- fewer unsold records sitting in storage,
- or the ability to intentionally add extra units for touring/merch
- all without the artist fronting manufacturing cash.

Fans also receive immediate digital access while vinyl is being manufactured, so the artist isn't forced to choose between early fan engagement and preserving vinyl sales momentum.

Below are the current all-in manufacturing estimates for a 12" Double LP.

GoodTunes® provides a better path for artists and labels

Because you don't pay out of pocket for vinyl manufacturing upfront. Fans purchase first, allowing GoodTunes® to dial in exact quantities before going to press. This helps optimize pricing tiers, reduce over-ordering, and gives artists the flexibility to add extra units for touring or merch — all without upfront manufacturing cash.

Fans also receive immediate digital access while vinyl is being manufactured, helping preserve fan engagement without sacrificing vinyl sales momentum.

As important never pay more than you would if you went to the manufacturer directly. We handle quotes, prep for manufacturing, fulfillment, customer service and so much more.

Hellbender Vinyl — 12" Double LP

Configuration	500 Units	Per Unit	1,000 Units	Per Unit
Color	\$7,030	\$14.06	\$10,975	\$10.98
Splatter	\$7,820	\$15.64	\$12,475	\$12.48

- Boutique collectible-focused press in Pittsburgh
- Premium packaging presentation
- Approx. 10–12 week turnaround

Memphis Record Pressing (MRP) — 12" Double LP

Configuration	500 Units	Per Unit	1,000 Units	Per Unit
Color	\$8,215	\$16.43	\$11,380	\$11.38
Splatter	\$8,965	\$17.93	\$12,670	\$12.67

- Memphis-based pressing plant
- Approx. 8–10 week turnaround
- Large-scale operational capacity

Example Artist Economics (1,000 units @ \$45 retail)

Item	Amount
Retail price (you decide this)	\$45.00
Manufacturing	\$10.98
Publishing (20 tracks × \$0.127 × 2 formats)	\$5.08
CC processing (2.9% + \$0.30)	\$1.61
GoodTunes® flat fee	\$4.50
Costs	\$22.17
Estimated artist profit / unit	\$22.83

Estimated artist profit on 1,000 units: approximately \$22,830.

Publishing above uses 20 tracks as a conservative placeholder. Current project is 16 tracks but we know that SoulChef may want to add tracks so we figured high. Artist profit — would improve if fewer tracks are ultimately included, at the same time fans may love the extras and drive more sales.

GoodDeed® Opportunity

GoodDeed® is an optional collectible upgrade allowing artists to offer signed personalized and numbered and authenticated certificates, QR-linked ownership experiences, and limited edition variants.

This creates additional fan engagement and incremental revenue on top of the base vinyl sale without requiring additional pressings.

Example Artist Economics (200 GoodDeed® Certificates at \$20)

Item	Amount
Signed GoodDeed® Certificate	\$20.00
Cost	\$7.00
Estimated artist profit / unit	\$13.00
